

UNITED STATES
ATOMIC ENERGY COMMISSION
WASHINGTON, D.C. 20545

October 22, 1969

OFFICE OF THE CHAIRMAN

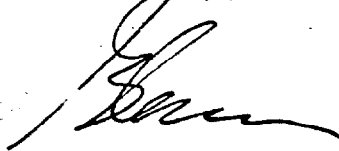

Professor Joshua Lederberg
Department of Genetics
Stanford University Medical
Center
Stanford, California 94305

Dear Joshua:

① I recall that in our very pleasant conversation at the Sodergarn I said that I would send you a copy of the paper on the fusion torch concept which has been prepared by two young AEC staff members, Drs. Bernard Eastlund and William Gough. I now enclose a copy of the paper for whatever use you wish to make of it. The authors have carried their study still further and will be presenting another paper at the Washington meeting of the American Institute of Chemical Engineers in November.

Your newspaper article on chemical mutagenic agents in the environment, which appeared in the Washington Post on October 18, was both interesting and useful. I enjoyed reading it.

Cordially,

Glenn T. Seaborg

Enclosure

① Thank you for remembering:

② and for your comment.

GLENN SEABORG
